Practice Questions and Answers

Read, revise and print useful study material in your language. No registration is required.

K53 CLLT is independent preparation. Its practice questions and screens are not the official test or its complete question bank, and practice scores cannot guarantee a pass.

01. Rain begins while you follow a car. How should your following gap change?

A. Make it smaller

B. Make it larger

C. Copy the car's speed exactly

02. A bend hides oncoming traffic. Overtaking would take you into its lane. What should you do?

A. Pass after sounding the horn

B. Cross the centre quickly

C. Wait for a safe, clear view

03. A car has stopped at a pedestrian crossing to let people cross. What should you do behind it?

A. Stay behind instead of passing it

B. Pass it slowly

C. Sound the horn and pass

04. An ambulance approaches with its siren and emergency lights operating. What is the safe response?

A. Accelerate to stay ahead

B. Make space predictably and safely

C. Follow it through the gap

05. You need to read a message while driving. What should you do?

A. Hold the phone below the window

B. Hold it between shoulder and ear

C. Park lawfully and safely before using it

06. You cannot establish whether the path behind is clear. What should you do before reversing?

A. Stop and check the path

B. Rely only on one mirror

C. Reverse faster to finish sooner

07. A secured load blocks your required view to one side. What must change before driving?

A. Add a red flag

B. Reposition the load to restore the view

C. Switch on hazard lights

08. You indicate to change lanes, but a motorcycle is alongside. What should you do?

A. Move because the indicator gives priority

B. Squeeze across slowly

C. Wait until the movement is safe

09. Petrol is about to be delivered into your vehicle’s tank. What should you do with the engine?

A. Switch it off

B. Leave it running if you stand outside

C. Leave it idling with hazard lights on

10. On an ordinary motorcycle requiring a helmet, the rider leaves the chin strap loose. What is needed?

A. Nothing on a short trip

B. Fasten the strap properly under the chin

C. Fasten it only when carrying a passenger

11. Your vehicle contributes to a collision causing damage, but has no visible damage itself. What must you do?

A. Leave because your vehicle looks undamaged

B. Leave if the other driver caused it

C. Stop and establish the injuries and damage

12. A stop line is marked on the road. This stop sign controls your approach and the junction looks empty. What is required?

A. Stop fully behind the stop line

B. Slow down without stopping

C. Stop only if another vehicle appears

13. Cross traffic is close enough to pose a hazard at this yield sign. What should you do?

A. Enter and expect it to brake

B. Yield, stopping if necessary

C. Park permanently at the sign

14. A useful shortcut begins beyond this no-entry sign. What is permitted?

A. Enter if you follow another car

B. Enter by reversing

C. Do not enter past the sign

15. What does the number on this round speed-limit sign specify?

A. The maximum speed in km/h

B. The minimum speed in km/h

C. The distance remaining in kilometres

16. This keep-left sign is displayed at an obstruction. Which route must you take?

A. Either side if it looks clear

B. Pass to the left of the obstruction

C. Turn left at the next intersection

17. You missed your destination and see this sign. May you turn to face the opposite direction here?

A. Yes, if the road is wide

B. Only buses are prohibited

C. No, a U-turn is prohibited

18. This no-stopping sign applies where you want to wait for a friend. What should you do?

A. Find a lawful stopping place elsewhere

B. Wait with hazard lights on

C. Wait if it takes less than a minute

19. You reach this warning sign before the actual stop sign. What does it tell you?

A. Stop exactly at this warning sign

B. Prepare for a stop control ahead

C. Accelerate before the junction

20. What risk should you prepare for after this children warning sign?

A. Only school vehicles may use the road

B. Children must always wait for cars

C. Children may cross the road ahead

21. This sign warns of a slippery road ahead. What is a sensible response?

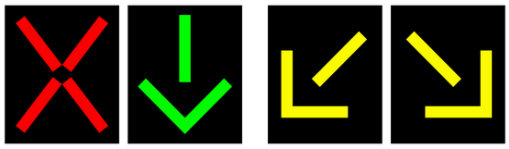

A. Ease speed and use smooth control inputs

B. Brake sharply when you reach it

C. Reduce your following gap

22. A red cross is displayed above your intended lane. What does it mean?

A. The lane is open to all traffic

B. The lane is closed to use

C. The lane is reserved for buses

23. On the illustrated geared motorcycle, which brake is operated by a foot?

Applies to Code 1

A. The front brake

B. The clutch

C. The rear brake

24. Which control is the left-hand lever on the illustrated geared motorcycle?

Applies to Code 1

A. The clutch

B. The throttle

C. The front brake

25. Which pair is operated by the right hand on this illustrated motorcycle?

Applies to Code 1

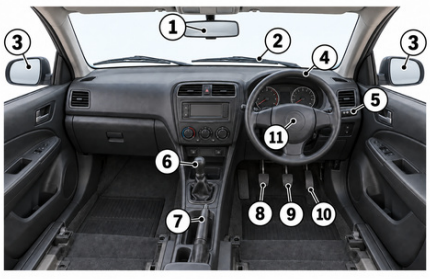

A. Clutch and gear lever

B. Throttle and front brake

C. Rear brake and mirror

26. In the illustrated manual light vehicle, what does the middle pedal operate?

Applies to Code 2

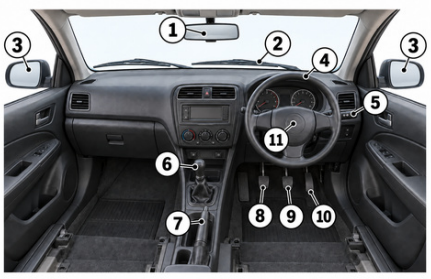

A. The clutch

B. The accelerator

C. The service brake

27. Which control is intended to secure the pictured light vehicle when parked?

Applies to Code 2

A. The parking brake

B. The wiper control

C. The horn

28. Rain is obscuring the windscreen. Which labelled light-vehicle control clears its outside surface?

Applies to Code 2

A. The indicator switch

B. The wiper control

C. The gear lever

29. Which pedal is absent from the illustrated automatic light-vehicle layout?

Applies to Code 2

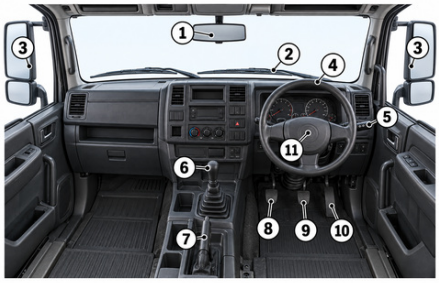

A. The service-brake pedal

B. The accelerator pedal

C. The clutch pedal

30. Which control changes direction in the illustrated heavy vehicle?

Applies to Code 3

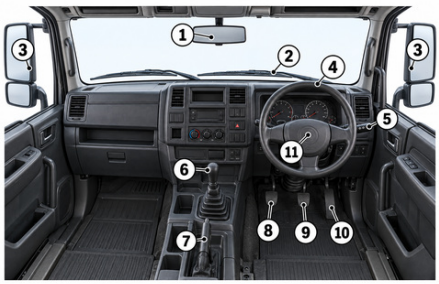

A. The steering wheel

B. The gear lever

C. The parking brake

31. Which pedal is on the left in the illustrated manual heavy-vehicle layout?

Applies to Code 3

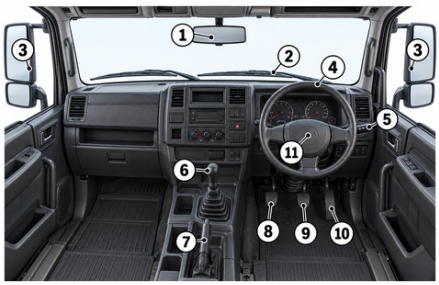

A. The service brake

B. The clutch

C. The accelerator

32. Before moving the pictured heavy vehicle, what do rear-view mirrors help you check?

Applies to Code 3

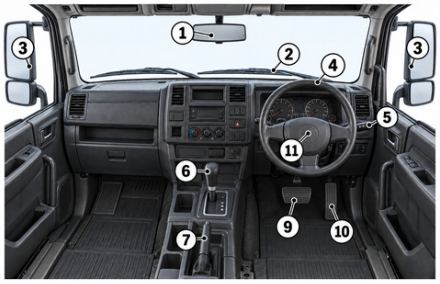

A. The fuel quantity

B. The engine speed

C. Traffic behind the vehicle

33. Which control does the manual say works differently in an automatic heavy vehicle?

Applies to Code 3

A. The gear selector

B. The horn

C. The rear-view mirrors

Answer key

01. B. Make it larger

Rain can reduce grip and visibility. Extra space gives more time to observe and slow down safely.

02. C. Wait for a safe, clear view

Do not enter the opposing lane when the view is too restricted for a safe pass. A horn does not remove that danger.

03. A. Stay behind instead of passing it

The stopped car may hide a pedestrian. Do not pass a vehicle stopped at a crossing to let pedestrians cross.

04. B. Make space predictably and safely

Give the emergency vehicle right of way. Check around you before making space so that your movement does not create another danger.

05. C. Park lawfully and safely before using it

Do not drive while holding the phone with a hand or another body part. Attend to the message after parking safely.

06. A. Stop and check the path

Reverse only when it is safe. Establish a clear path and continue observing throughout the movement.

07. B. Reposition the load to restore the view

Secure fastening alone is insufficient. The load must also leave the required front, side and rearward views clear.

08. C. Wait until the movement is safe

An indicator communicates intention, not priority. Check the surrounding traffic and change lanes without obstructing or endangering others.

09. A. Switch it off

The engine must not run while petrol or another flammable fuel is delivered into the tank. Hazard lights do not change that requirement.

10. B. Fasten the strap properly under the chin

A suitable helmet must fit properly and have its chin strap fastened. Merely resting it on the head is insufficient.

11. C. Stop and establish the injuries and damage

The duty to stop applies when you are involved in or contribute to the collision. It does not depend on damage to your own vehicle.

12. A. Stop fully behind the stop line

The stop requirement applies even when no traffic is visible. After stopping, proceed only when it is safe.

13. B. Yield, stopping if necessary

Give way to the conflicting traffic. Reduce speed and stop if that is needed to let it pass safely.

14. C. Do not enter past the sign

The sign prohibits entry to that road, carriageway or lane. A convenient route or another driver's action does not provide permission.

15. A. The maximum speed in km/h

This is an upper speed limit from the sign. Conditions may require a lower speed; the number is not a target.

16. B. Pass to the left of the obstruction

The arrow directs the side on which you must pass the obstruction. It is not a warning about a later turn.

17. C. No, a U-turn is prohibited

The sign prohibits turning the vehicle around to face the opposite direction. Find another lawful route.

18. A. Find a lawful stopping place elsewhere

Voluntary waiting is not allowed where stopping is prohibited. Hazard lights or a short duration do not grant permission.

19. B. Prepare for a stop control ahead

It warns of a stop sign ahead that may be difficult to see in time. Prepare to stop at the actual stop control.

20. C. Children may cross the road ahead

Look out for children and be ready to slow or stop safely. The sign warns of a risk, not an exclusive vehicle lane.

21. A. Ease speed and use smooth control inputs

Reduced grip calls for caution and extra space. Abrupt braking or steering can make control more difficult.

22. B. The lane is closed to use

The red cross prohibits using the lane below it. A green downward arrow indicates an available lane instead.

23. C. The rear brake

The pictured rear brake is foot-operated. The front brake uses a hand lever; the footrest is a different component.

24. A. The clutch

The illustrated clutch lever is on the rider’s left. The throttle and front-brake lever are on the right.

25. B. Throttle and front brake

The right grip controls the throttle and the right lever operates the front brake. This question refers to the pictured geared layout.

26. C. The service brake

The manual layout has clutch, brake and accelerator from left to right. Identify the brake separately from the other pedals.

27. A. The parking brake

The parking brake secures a stationary vehicle. Its physical control can vary between models; it is not always a hand lever.

28. B. The wiper control

Wipers clear the windscreen’s outside surface. Indicators signal direction, and the gear lever selects a transmission setting.

29. C. The clutch pedal

This automatic layout has brake and accelerator pedals without a clutch pedal. Learn the fitted controls before operating another vehicle.

30. A. The steering wheel

The steering wheel controls direction. The gear lever selects gears and the parking brake secures the stationary vehicle.

31. B. The clutch

The pictured manual layout places the clutch on the left. Do not assume an automatic vehicle has the same pedals.

32. C. Traffic behind the vehicle

Rear-view mirrors provide information about traffic behind. They do not remove blind areas, so the required additional observation remains necessary.

33. A. The gear selector

The automatic selector differs from a manual gear lever. Learn the actual selector before use rather than copying a manual gear-change sequence.
