K53 CLLT / English

Seven-day Study Plan

Read, revise and print useful study material in your language. No registration is required.

K53 CLLT is independent preparation. Its practice questions and screens are not the official test or its complete question bank, and practice scores cannot guarantee a pass.

Seven study sessions with reading, recall and review tasks. Repeat or split days as needed; seven days is a planning aid, not a promise of readiness.

Day 1: assess and organise

Take the free assessment if you have not completed it; otherwise review your first recorded baseline. That first baseline stays fixed. Record weak topics, read the licensing and licence-procedures lessons, and choose your code and study times.

[ ] Recall the difference between a learner code and a driving-licence code without looking.

[ ] Start an error log and an application checklist; repeat this session if the basics remain unclear.

Your notes

Day 2: read signs as a system

Read sign families, control and priority signs, and traffic lights. Compare the instruction with the action it requires in a specific road situation.

[ ] Cover the explanation and describe the meaning of three different sign families.

[ ] Explain one pair of similar signs and revisit yesterday’s uncertain topic.

Your notes

Day 3: road position and intersections

Read road position, intersections and signalling. Draw a simple junction and explain where you would position, observe and signal; check your explanation against the lessons.

[ ] Recall the conditions before acting at an intersection, including people crossing.

[ ] Correct one mistake from your error log and read the pedestrian lesson.

Your notes

Day 4: speed, space and stopping

Read speed, following distance, stopping and parking. Separate a legal limit from the speed and space that conditions require.

[ ] Explain how reduced visibility changes the way you maintain a safe space.

[ ] Compare stopping with parking, then recall one sign and one junction rule from earlier days.

Your notes

Day 5: your vehicle controls

Read the controls lesson for the learner code you chose. Identify each control and its purpose; use the other code lessons only when relevant to your vehicle.

[ ] Name the controls without the labels and explain a coordinated action.

[ ] Review your weakest rules or signs topic and correct the explanation in your error log.

Your notes

Day 6: mixed recall and review

Review your fixed first-assessment baseline and recall rules, signs and controls together. Reading and this checklist do not replace that baseline. Add topic practice or full mocks only if you have verified Study Pass access.

[ ] Explain why an answer is correct, especially when you guessed.

[ ] Group remaining errors by topic; schedule another reading and recall session for each weak group.

Your notes

Day 7: review and make a decision

Revisit the error log and explain the corrected topics without notes. Repeat or split any day that needs more work; missing a day does not mean starting the entire plan again.

[ ] Check your ID, appointment confirmation, venue, arrival instructions and fees with the DLTC.

[ ] Choose more preparation time if understanding is inconsistent. Completing this checklist does not guarantee a pass.

Your notes
